## OBJECTIVE

Full Stack Developer with 3+ years of experience in fintech environments, combining modern front-end technologies like React.js, Next.js, TypeScript, Tailwind CSS, and React Native with solid back-end development using PHP (CodeIgniter) and MySQL. Skilled in building scalable web and mobile applications, creating reusable components, and implementing responsive, accessible, and high-performance user interfaces. Skilled in advanced front-end techniques including Server-Side Rendering (SSR), lazy loading, and component optimization. Experienced in RESTful API integration, app build and deployment processes for both mobile (React Native) and web applications. Familiar with agile methodologies (Scrum, Kanban), version control (Git/GitLab), and performance optimization practices. Native Portuguese speaker with advanced English proficiency (C1). Open to new challenges in innovative, technology-driven teams.

## EDUCATION

**Bachelor's in Information Systems**, Estácio de Sá 2022 – 2024

## SKILLS

Technical Skills	React.js, Next.js, React Native, Vue.js, Node.js, TypeScript, JavaScript, Tailwind CSS, PHP, CodeIgniter, MySQL, RESTful APIs, Jest
Software and Tools	Git/GitLab, Figma, React Hook Form, Zod, React Query, Expo
Soft Skills	Communication, Problem Solving, Teamwork, Proactivity, Adaptability
Methodologies	Agile (Scrum/Kanban), Git Flow, Clean Code, Component-Based Architecture, MVC Architecture
Languages	Portuguese (Native), English (Advanced – C1)

## EXPERIENCE

**Full Stack Developer** Sep 2023 – Present  
Finne (Fintech Startup) On-site

- Developing responsive and dynamic interfaces using React and Next.js.
- Writing maintainable, scalable code with TypeScript.
- Building and maintaining RESTful APIs using PHP and CodeIgniter.
- Designing, querying, and optimizing MySQL databases.
- Implementing business logic and ensuring system performance and security.
- Creating and maintaining cross-platform mobile applications using React Native.
- Working in an Agile environment (Scrum), participating in sprint ceremonies and using Jira for task tracking.
- Managing code with Git and GitLab.

**Front-End Developer (Freelance)** Oct 2024 – Present  
Hobb (Cloud-based Financial Solutions Hub) Remote

- Developing and maintaining front-end features using Next.js and React.
- Implementing dynamic forms with validation using React Hook Form and Zod.
- Building UI components with Shaden and Tailwind CSS, ensuring consistency and accessibility.
- Handling data fetching and caching with React Query, providing responsive user experiences.

- Collaborating directly with the product team to deliver intuitive, scalable interfaces aligned with business goals.

## Full Stack Developer

Mar 2022 – Jul 2023

Dimensa (Technology for the Financial Market)

*On-site*

- Developed high-quality mobile applications using React Native and dynamic websites with React.js.
- Delivered full-cycle development from conception to app store deployment and continuous maintenance.
- Built and maintained backend services with PHP and MySQL.
- Collaborated with cross-functional teams using Agile methodologies (Scrum and Kanban).
- Participated in product discussions and decision-making to improve features and user experience.
- Managed code with Git, ensuring version control and continuous integration.

## PROJECTS

---

**Multilingual Personal Portfolio** – Modern website built with Next.js, supporting i18n, Framer Motion animations, responsive layout, and a contact form with custom validation.

**Digital Signature Platform** – Building a digital signature system with a clean and minimalistic layout using Next.js 15, Tailwind CSS, React-Query. Features include secure authentication, document visualization, KYC (selfie and ID capture), digital or certificate-based signing, and contract finalization.

**Attendance App (Workforce Management)** – Developing a mobile time tracking application with React Native, backed by a Node.js and MySQL API. The platform includes user check-in/check-out, geolocation, camera and an admin dashboard for managing employee records, work schedules, and reports. Designed for scalability and future integration with payroll systems.
